DETAILED ACTION

Allowable Subject Matter

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The independent claims comprise an apparatus and method for sampling where a needle can be driven by a carriage and rotated about an axis. One of the pulleys for driving a belt for driving the carriage also functions as the pivot for the rotation. The prior art teaches pivoting the needle or other sampling element (see United States Patents 3,858,450, 4,499,053, 4,869,114) and driving the needle (see United States Patents 3,748,911, 4,000,973, 5,756,905). Other references teach rotating and driving the needle (see United States Patent 3,949,615, 4,343,766, 4,927,603, 5,744,729). However, none of these references teach or suggest using a pulley for both driving a carriage and as a pivot for rotating the needle.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
